Skills

- Programming Languages
- Electronic Circuit Design
- Algorithm Analysis
- Embedded Systems
- Digital Signal Processing
- Web Development
- Database Management
- Microcontroller Programming

EDUCATION

SEPTEMBER 2021 TO PRESENT: Bachelor in Computer science
UNIVERSITY OF LODZ

SEPTEMBER 2019 TO SEPTEMBER 2020: Bachelor in Electronic and Telecommunications Engineering

FACULTY OF SCIENCE AND TECHNOLOGY OF BENI MELLAL

PROFESSIONAL EXPERIENCE

DECEMBER 2021 TO PRESENT: Full time job: AR Process specialist in Infosys

As an Account Receivable Specialist fluent in French, My main duties include cash collection, cash application, and reporting. I've learned this field from scratch, demonstrating adaptability and fast learning. Furthermore, I leverage my programming skills to create Macros using VBA, and automating processes.

May 2020 TO Aug 2021: Full time job: Electrical Maintenance Assistant in the Moroccan Tobacco Company

As an Electrical Maintenance Assistant I conducted routine inspections of electrical systems to identify potential issues or malfunctions, I also assisted repairing or replacing faulty electrical components such as switches, outlets, wiring, and circuit breakers.

JULY TO AUGUST 2018: Internship: Junior Electrical Maintenance Engineer in the National Office of Electricity and Potable Water

During my internship my main priority was performing maintenance tasks to ensure the efficiency of the electrical infrastructure. Working alongside experienced technicians, I was able to refine my troubleshooting abilities and gain practical knowledge in improving electrical systems.
